

Medical Imaging Workflow Management

Imagine Healthcare Connected

DataFirst delivers image management solutions that match the pace of healthcare's rapidly evolving business and technology needs without disrupting clinical workflows.

We enhance the capabilities of existing health IT systems by establishing multi-dimensional connections that provide clinicians, physicians, administrators and patients with immediate access to structured and unstructured imaging data on any viewer, mobile device, exchange or portal.

Experience Matters

For over two decades, we have worked with every PACS, RIS, VNA and modality vendor to manage the imaging data their customers rely on every day. That's hundreds of health IT systems connected and billions of studies managed.

We integrate any imaging technology system, legacy or current, connecting care providers to the imaging data they need—anytime, anywhere. We imagine healthcare connected, and we deliver.

datafirst™

Unparalleled Experience

A sample of the more than 100 systems we have integrated with:

AGFA 

- » Heartlab
- » IMPAX (DVD) Cardio
- » IMPAX (UDP) Radiology

Camtronics

- » Archium
- » Vericis

Carestream

- » CMAX

FUJIFILM

- » Prosolv
- » Synapse Radio
- » Synapse Cardiovascular

- » Centricity (All Versions)
- » Dynamic Imaging/GE-IW
- » EchoPACS (All Versions)
- » Enterprise Archive
- » GEMnet (All Versions)
- » Image Vault
- » RadWorks

LUMEDX

- » CardioPACS

MCKESSON

- » Horizon CPACS
- » Horizon PACS
- » Medcon
- » TCS Symphony

MERGE

- » Amicas
- » VIS Based System

PHILIPS

- » EasyAccess
- » Enconcert
- » Intellispace
- » Inturis NT
- » Inturis Online
- » Inturis Suites
- » iSite
- » Witt Image 4
- » Xcelera
- » IWS/FOCUS

SECTRA

- » Sectra PACS

SIEMENS

- » ACOM
- » ACOM.Net
- » ISA
- » KinetDx (All Versions)
- » SIENET MagicStore
- » Syngo Dynamics
- » Syngo Imaging
- » Syngo Plaza

Advanced Routing & Workflow Technologies

DataFirst reimagines healthcare connections. We mobilize imaging data, speed routing and exchange, and optimize workflows to connect every step of the patient journey wherever care is diagnosed or delivered.

Turnkey Data Migration Services

DataFirst powers data migration for PACS, RIS, VNA, EMR and EHR systems in more than 50% of U.S. hospitals, connecting providers with mobilized, vendor-neutral imaging data at the point of care delivery.

Over Two Decades of Image Management

We have been solving healthcare's toughest image management and workflow challenges for more than 20 years—within departments, between facilities and across integrated delivery networks.

Trusted by Industry Leaders

The only company trusted by healthcare's major technology manufacturers to manage their customers' imaging data.

"DataFirst's suite of management and technical tools are definitely the gold standard for PACS migration. We were able to fully maintain clinical operations without any disruption during the migration."

Cardiovascular PACS Project Manager

"DataFirst's hyper migration services moved over 32 terabytes of data in 12 days. Using normal migration methodologies, it probably would have taken the better part of 18 to 24 months."
