

Take Control of Your Enterprise Imaging Management

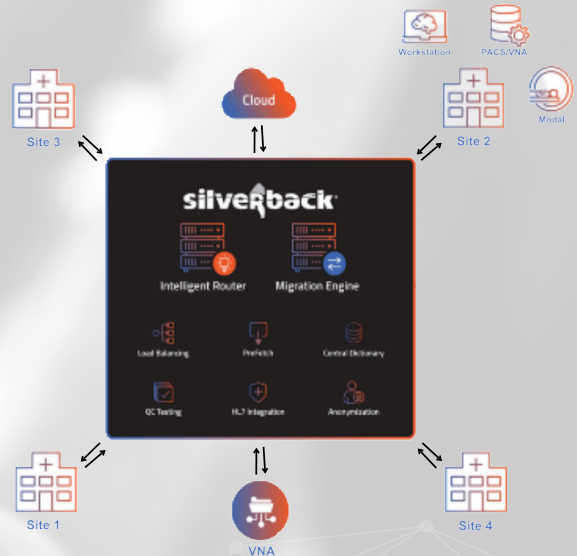

The Silverback® platform enables organizations to manage the entire imaging network with insights and automation through an intuitive interface at any time, from anywhere. With a dynamic set of DICOM services and tools, customers can design and deploy solutions for intelligent study distribution to the most complex workflow scenarios.

The platform may be customized and scaled in any of the following configurations:

- Silverback® **Vue** - Intelligent DICOM Routing
- Silverback® **Enterprise** - Workflow automation, HL7, Archiving, Q/C, HA and more
- Silverback® **Pro** - Migration Engine plus Vue plus Enterprise

Silverback® Advantage

- Customize workflows and routing based on unique organization needs
- Improve efficiency with user defined logic and profiles
- Ensure imaging network monitoring from any device at any time
- Enable data independence from proprietary systems and vendors
- Scale the solution based on your time frame and business needs

Trust the Leaders in Imaging Interoperability

- 2B+** Studies Managed
- 100+** Health Systems Integrated
- 100%** U.S.-based Development and Support

DataFirst is the leader in solving the toughest imaging interoperability workflows with it's Silverback® Workflow Engine.
